CAREER OBJECTIVE

2026 B.Tech Information Technology graduate with a strong foundation in Python, JavaScript, React, Node.js, FastAPI and MongoDB, seeking an entry-level Software Developer position, with hands-on experience developing full-stack applications and Python automation projects, along with knowledge of REST APIs, authentication, database integration, debugging and software testing, while also demonstrating leadership and coordination skills by representing 120+ IT students, coordinating academic communication with faculty and organizing 10+ technical workshops and academic activities.

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology | 2022 - 2026
Malla Reddy University, Hyderabad | CGPA: 7.7/10.0

TECHNICAL SKILLS

Languages: Python, JavaScript ,SQL
Frontend: HTML5, CSS3, React.js
Backend: Node.js, Express.js, FastAPI, REST APIs
Databases: MongoDB,MySQL
Testing: Unit Testing, Integration Testing, API Testing, E2E Testing, pytest,
Tools: Git, GitHub
Core: Data Structures, OOP, DBMS, Software Development, Debugging, Troubleshooting, API Integration

PERSONAL PROJECTS

RoadCare - AI Road Damage Detection Platform | Jan 2026 - Apr 2026
Tech: Python, FastAPI, React, MongoDB, OpenCV, YOLOv8, H3
GitHub: github.com/jelsingearun/RoadCare---AI-Based-Road-Damage-Pothole-Detection-System

- Developed a full-stack road-damage application integrating React, Python/FastAPI and MongoDB, delivering reporting, image-processing, validation and authority-review workflows.
- Implemented JWT authentication, role-based access, input validation and rate limiting (60 requests/minute) for controlled API access.
- Validated the application with unit, integration, database, geospatial, API and frontend E2E testing across 6 testing categories.

Academix - Academic Collaboration Platform | Jul 2024 - Nov 2024
Tech: React 19, JavaScript, Node.js, Express.js, MongoDB, TensorFlow.js, JWT
GitHub: github.com/jelsingearun/Academix

- Developed a full-stack collaboration platform using React, JavaScript, Node.js, Express.js and MongoDB with integrated student collaboration workflows.
- Built REST APIs with authentication, input validation, persistence and role-based access to support structured application operations.
- Integrated peer-matching using TensorFlow.js scoring and ranking to match students based on available profile and activity data.

GitHub Repo Automator | Jan 2026
Tech: Python, Git, GitHub CLI, Security Automation
GitHub: github.com/jelsingearun/github-repo-automator

- Created a repository automation CLI supporting folders, ZIP archives and individual files, automating GitHub repository creation across 3 input formats.
- Implemented security scanning to detect credentials, private keys, suspicious functions and high-entropy secrets across 6 threat categories.
- Automated Git initialization, repository creation, secret sanitization, templates, logging and dry-run execution, with validation across 5 functional areas.

CERTIFICATIONS

- HackerRank: SQL (Basic); IBM Skills Network: Introduction to Python Programming; NPTEL: Cloud Computing

LEADERSHIP AND EXTRACURRICULAR

Class Representative, Malla Reddy University | 2024 - 2026

- Represented 120+ IT students by coordinating academic communication with faculty and organizing 10+ technical workshops and academic activities, ensuring effective student-faculty coordination.
